Job Description

Android / iOS Developers

Company Introduction

We are a digital media company that is both a content producer and platform provider. We focus on children's entertainment and educational content for emerging markets. Our content is offered through a SVOD / interactive platform that now has members in 61 countries. Our core technology is Python/Django and we have integrated apps in both iOS and Android. We are a start up with excellent international exposure. Our work environment brings together the best creatives with the best developers. We offer a flexible, performance based work culture and seek entry level talent to grow with the company.

Position

We are looking for junior iOS and Android developers to assist in maintenance and improvement of existing applications aimed at a range of devices including mobile phones and tablet computers. Your primary focus will be improving the existing MVP1 version of the applications and adding additional features. You will be working alongside other developers and UI/UX team on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and the creation of quality products is essential.

Responsibilities

- Maintain and improve applications for the iOS and Android platforms
- Ensure the performance, quality, and responsiveness of applications
- Collaborate with a team to define, design, and ship new features
- Identify and correct bottlenecks and fix bugs
- Help maintain code quality, organization, and automatization

Skills

- Proficient with iOS and/or Android frameworks
- Experience with offline storage, threading, and performance tuning
- Familiarity with APIs to connect applications to back-end services
- Knowledge of other web technologies and UI/UX standards
- Understanding of design principles and interface guidelines
- Experience with performance and memory tuning
- Familiarity with cloud message APIs and push notifications
- Knack for benchmarking and optimization
- Proficient understanding of code versioning tools
- Familiarity with continuous integration

Requirements

Excellent communications skills and abilities to work as part of a team

Ability to work unsupervised and be accountable for high levels of deliverables

Willingness to learn and grow

Willingness to be part of a start-up culture with a sense of accountability to the bottom line

Degree or diploma in Computer Science or relevant field or in later stages of completing degree or diploma
